

MULTI-LAYER GATEWAY CONTROL (FIREWALL-LIKE RULES)

Xgenplus has a firewall module called spamjadoo at the application (TCP listener) level that allows the administrator(s) to control connectivity parameters from IP based role limit to blacklisting IPs, RDNS, SPF, DLIM, ESP & separate dashboard control for each user.

JMAIL ACCOUNTS (MAGICAL EMAIL ACCOUNT)

Jmail allows custom accounts to be created as programmable extensions to your mail account, and rules to be assigned to each such account.

HOMOGRAPH ATTACK PREVENTION

Xgenplus magically detects and alerts the user.

MESSAGE INTEGRITY VALIDATION (DOMAIN KEYS COMPLIANT)

The messages' integrity may be checked if the originating server used domain keys to sign them locally-originated messages may be signed by Xgenplus to allow validation by domain keys-compliant remote servers.

SNOOZE

This allows a user to temporarily disappear email for a user defined time from inbox and make it appear as a fresh email in the inbox on defined date & time.

DATA LOSS PREVENTION

This allows detection monitoring and blocking sensitive data also help to recover deleted emails.

CONTENT FILTERING

Spamassassin, bayesian, keyword and type of attachment based content filtering is available to the administrator to use.

DNSBL, DBL/RHSBL

Administrators validate sender IPs against a selected list of DNSBLs (DNS blacklists) and DBL/RHSBL in order to block emails at the same time, they can also choose to skip this validation for custom defined IP ranges.

ANTI-VIRUS FILTERING

Xgenplus advanced filtering system allows the system administrator to define a set of filters and priorities at server, domain or user level, offering unparalleled flexibility to setup company security policies.

Xgenplus gives you capability to use your multiple email accounts in one account including ASCII & non ASCII email address of any scripts.

EXCLUSIVE FEATURES

POWERFUL SECURITY FEATURES

SEND ENCRYPTED EMAIL

- PGP Encryption (Pretty Good Privacy) is a public-private key cryptography system.
- Prevents your email from being read by any third party and allows a secured transmission of emails. Receive Encrypted emails which others cannot read even after login into your account.

SPAM PROMO

- User is alerted of suspicious emails.
- Blocks spam and malware at the protocol level by checking the sender's reputation against a dynamic database of known malicious IP addresses.

GIVE ACCESS OF YOUR EMAIL ACCOUNT

- Authorize your subordinates or your agents to receive your emails.
- They can reply on those mails on your behalf without sharing login credentials of your account.

SECURE FOLDER

Secured folder is protected by additional password and storing very sensitive correspondence.

HIDDEN ATTACHMENT

Hide Attachment feature is next level security feature that gives you the option to concealed the confidential attachment inside harmless dummy picture.

DOWNGRADING - BACKWARD CAPABILITY

Help to deliver all your emails to non EAI ready email servers which do not offer SMTPUTF8.

DEVISE SPECIFIC ACCESS CONTROL

This feature is very prominent to those users who are not allowed to access their accounts on different devices due to security reasons.

COUNTRY SPECIFIC ACCESS CONTROL

Xgenplus gives you a platform where admin can decide that users of his/her organization, can access their account in different geographic locations.

DUAL STEP AUTHENTICATION SMS BASED OR XCODE

By enabling **Dual Authentication** you can keep unauthorized users away from your account & hackers cannot login in to your account. Xcode allows you to login without SMS/ mobile.

SENDER VALIDATION (SPF/DOMAIN KEYS COMPLIANT)

Xgenplus implements a standard-based SPF verification module for sender validation and allows administrator to configure the implementation.
